► MAKE AN IMPACT WITH DGX DIGITAL INDOOR ACTIVE SIGNAGE

DGX DALD-Outdoor active LED is a state-of-the-art LED display solution that offers exceptional picture quality and advanced features for businesses and organizations that require high-performance visual communication and marketing. The Outdoor Active LED features a cabinet that makes it ideal for various indoor applications such as Government Departments (Conference halls, Seminar halls, Board rooms), and corporate lobbies etc.

► DESIGN WITH QUALITY

In order to ensure the highest quality, our product is put through several layers of testing. Die-casting aluminum, which has good dimensional stability, is light and rust-proof and serves as the body of our LED Display Wall, extending its life and depend ability.

► FAN LESS & NOISE LESS SOLUTION

Our most recent line of LED's is capable of controlling internal temperature. Since these LED's don't have cooling fans, they operate quietly.

► FRONT & REAR MAINTENANCE

Our LED Display Walls are very simple to Operate from both the front and the back. Everytime a problem occurred, conventional display walls had to be handled from the back. The most recent LED display walls, how ever, provide you the opportunity to trouble shoot from the front without damaging any wiring.

Outdoor Active LED
